

# **MIKE ASHEY PRODUCTIONS**

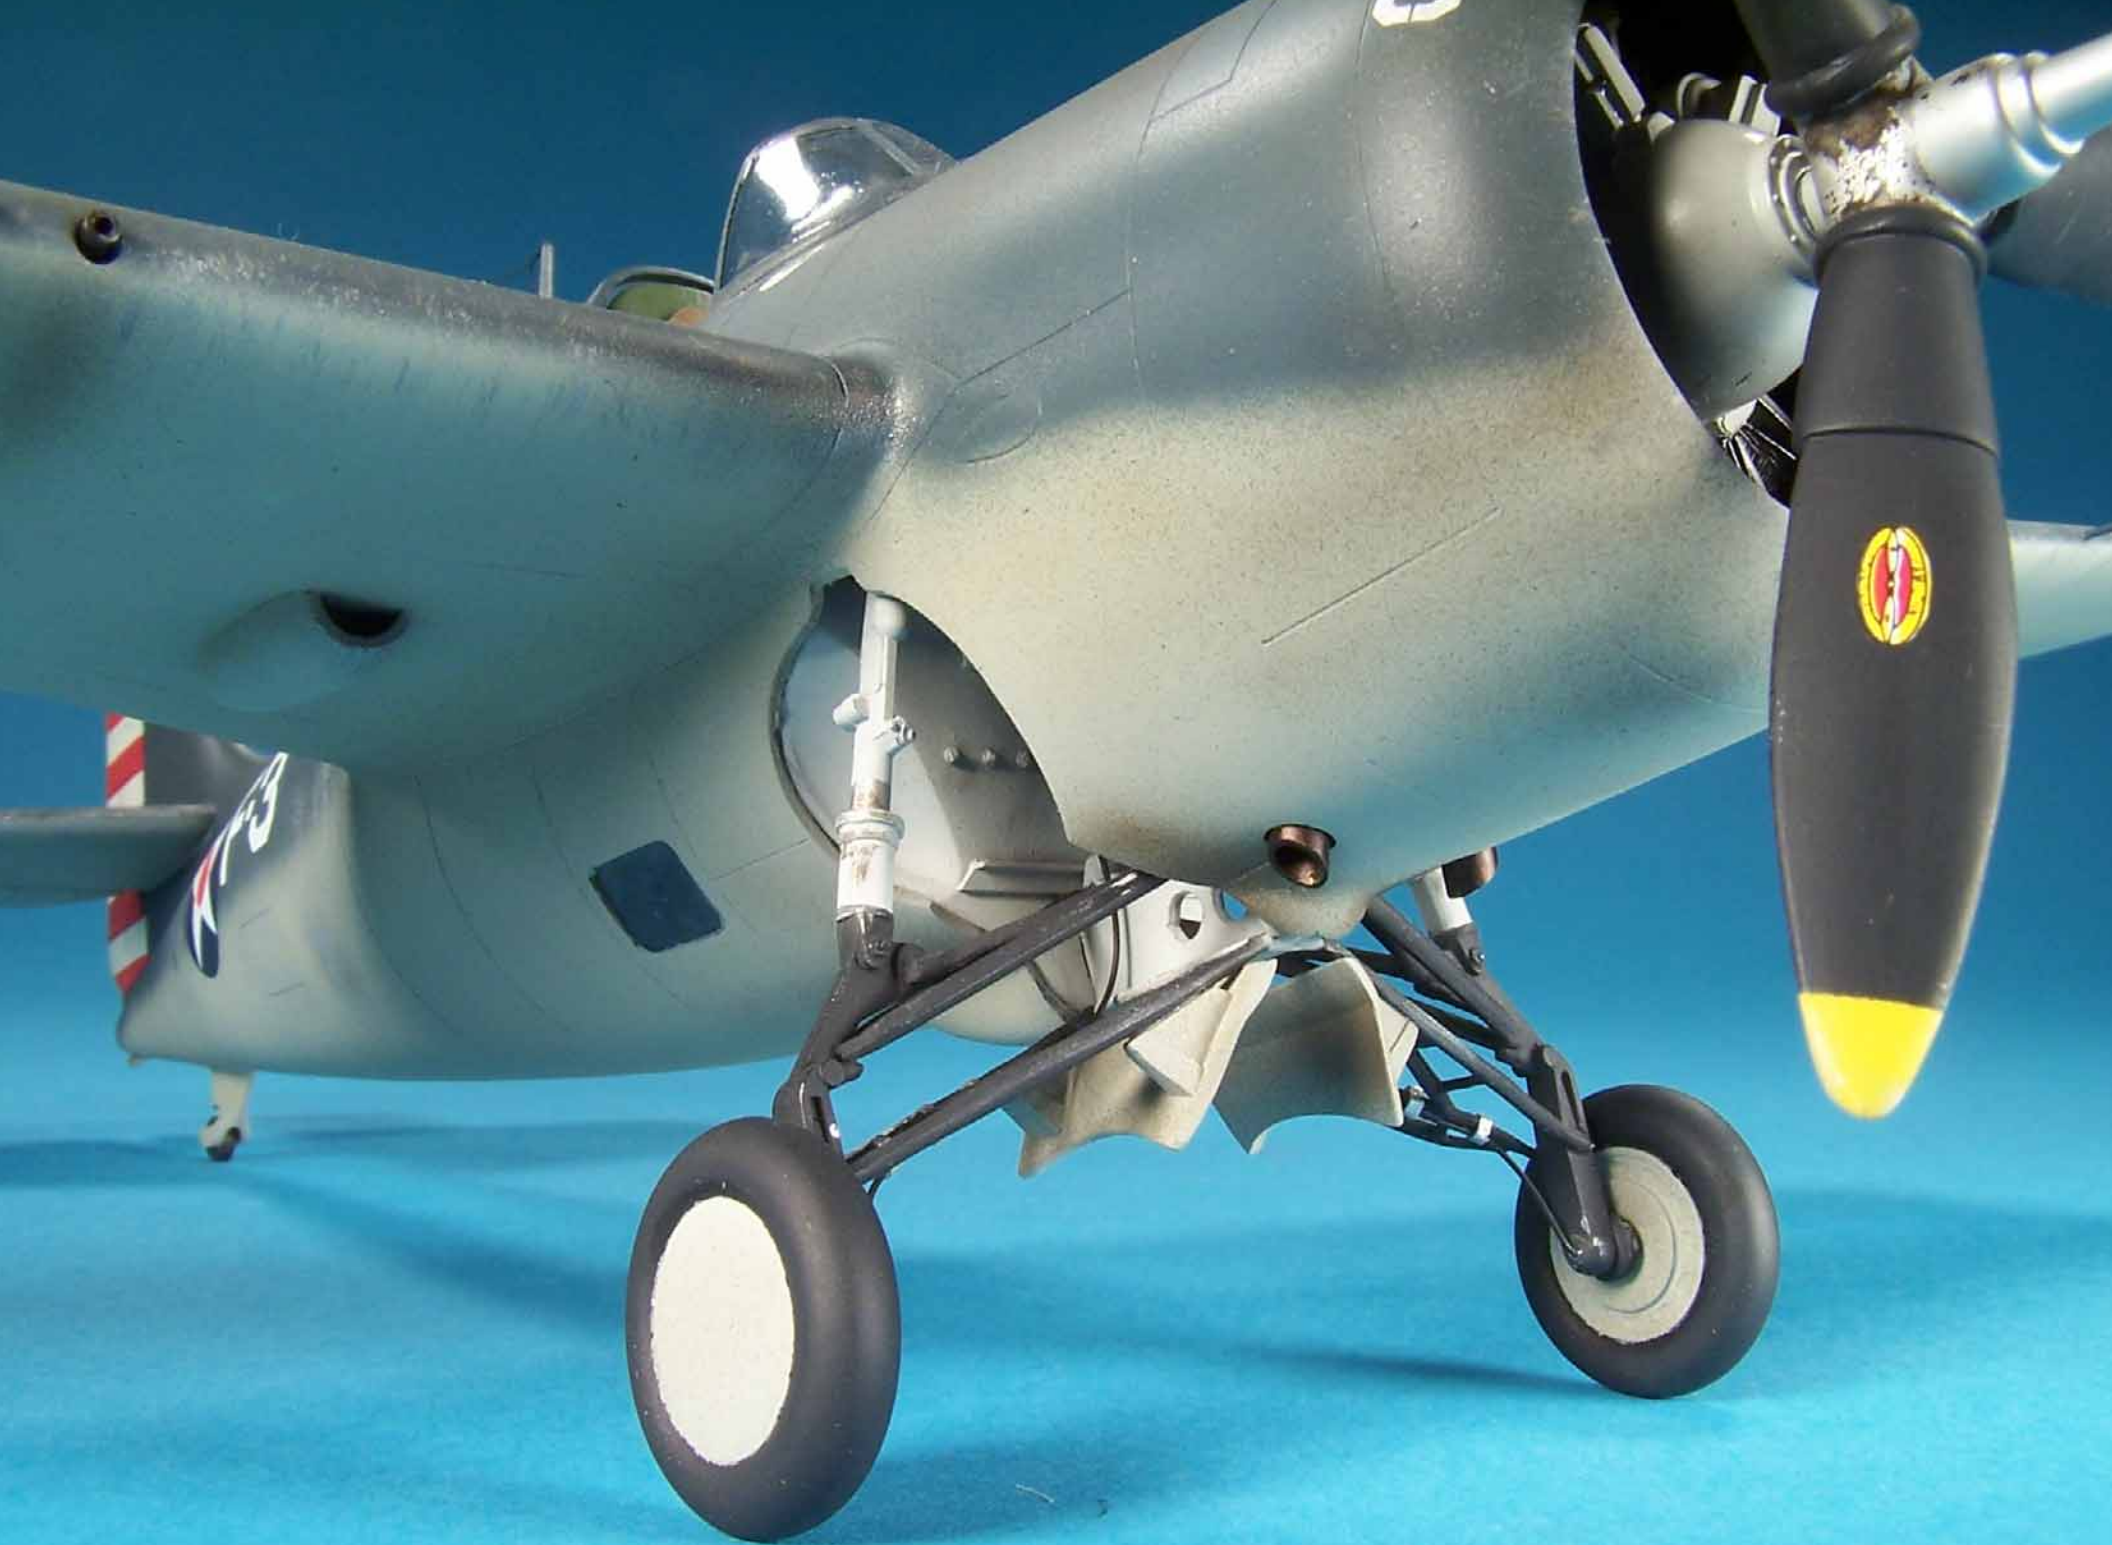

**1/32 SCALE F4F - 3 WILDCAT  
MANUFACTURER : REVELL  
MODEL BUILT BY : MIKE ASHEY**

## **KIT DESCRIPTION AND BUILDING NOTES**

This Revell kit was built long before there were resin and prepainted photoetch detail sets. The cockpit was scratchbuilt and Waldron Products instrument dials and placards were used. The seat belt buckles are from Model Technologies. The raised panel lines and rivet detail were sanded off and the lines rescribed with a Bare Metal Foil plastic scribe. The engine was reworked and wired and new push rods were added. The model is painted with Testors model master enamel paints. The book titled “**Model Aircraft Tips and Techniques**”, which is located in the book section of this web site, documents how I scratchbuilt the cockpit and scribed the panel lines.
