

MIKE ASHEY PRODUCTIONS

**1/32 SCALE F6F – 3 HELLCAT
MANUFACTURER : HASEGAWA
MODEL BUILT BY : MIKE ASHEY**

KIT DESCRIPTION AND BUILDING NOTES

To detail the cockpit I used both the Verlinden resin cockpit detail set and an Eduard unpainted photoetch cockpit detail set. The rudder and elevator were removed and reattached and the engine was wired with soft brass beading wire. The engine exhausts were also hollowed out. I also filled in the panel lines with super glue and thin plastic strip, sanded the surfaces smooth and rescribed the panel lines. I used two kits to build this model. Testors model master enamel paints were used to paint the model.
