

This kit was an original PYRO kit, then a LIFE LIKE kit and it can be built into an impressive model. There is a set of photos of a built one on the aircraft gallery page. Several of these early flying machine models were issued by Pyro in 1/48 scale and then by Renwal in 1/72 scale after the movie "Those magnificent men in their flying machines" made it to the big screen. These kits can be found on EBay.
