

GERMAN PANTHER A TANK
DRAGON 1/35 SCALE KIT
MODEL BY RICHARD LOBINSKE

A mostly out of the box build. The model was brush painted with Testors water base colors. A tri-color pattern was applied and then a coat of thinned flat white was streaked over the base colors to produce an aged winter paint job. The turret numbers were lightly sanded with 600 grit sandpaper to produce wear and age effects. Woodland Scenics terrain foam filler was used to build up mud in and around the running gear.
