

# **MIKE ASHEY PRODUCTIONS**

**HO SCALE OLD TIME CANNERY  
MANUFACTURER :IHC  
MODEL BUILT BY : MIKE ASHEY**

## **KIT DESCRIPTION AND BUILDING NOTES**

This model was built out of the box. The only thing that was added was a layer of aluminum foil over the top disk for the water tank. The slightly crumpled foil gives the appearance of water that is slightly disturbed by a gentle wind thanks to some basic dry brushing techniques with different shades of paint. The model was painted with Testors enamel spray cans to demonstrate to the local Model Railroad Club how to achieve a good paint finish with spray cans. The weathering was achieved using pastel pencil dust applied with a wide flat brush.
